LECTURES

TALES OF WOMEN AT SEA

★ March is Women's History Month

Be inspired by the little-known yet fascinating experiences of whaling wives. By the 1850's, one out of six whaleships carried the captain's wife aboard. Find out how trailblazing women broke boundaries in a male-defined era and sailed the world. Explore what life was like for these women at sea, including where they gave birth, what they ate for dinner, how they looked after their children, how they celebrated holidays, and how they passed the time.

WHALING ON LONG ISLAND

★ May 22 is National Maritime Day

Did you know that whaling was one of Long Island's first and most important industries? Explore the rise and fall of whaling through local fleets which traveled to the far corners of the world. Be transported to a time when whalers roamed the streets between journeys, shipbuilders worked in the harbors, captains charted their expeditions, and whaleship masts seemed to pierce the clouds in Long Island's pursuit of the largest creatures in the world!

INSIDE THE MIND OF A WHALE

★ June is Ocean Science Month

Do dolphins name themselves? Do whales use tools? What do we know about the capacity of whales' brains? Join us for a fascinating talk about one of the most complex species on the planet. Marvel at the depth that sets whale behavior apart, including sophisticated memory skills, advanced societal structures, and unique dialects. Find out what researchers have uncovered about whales' thinking and their amazing behaviors in the wild.
